## 2007 H2E CHAMPIONS FOR CHANGE AWARD

Covidien's efforts to green its own operations and improve the environmental performance of its customers was recently recognized by Hospitals for a Healthy Environment (H2E). H2E recognized Covidien's SharpSafety division with the 2007 Champions for Change Award.

*"The SharpSafety Division is at the forefront of a fundamental shift in the healthcare industry. By introducing healthier and more responsible products and practices, SharpSafety is helping healthcare facilities everywhere to operate in ways that protect the health of patients, workers, communities and the environment. This is a revolution that benefits everyone."*

H2E Executive Director Laura Brannen

## Covidien

### Taking the waste out of healthcare.

The disposal of sharps and pharmaceutical waste can create unique challenges for healthcare facilities seeking to adopt environmentally responsible practices. In addition to environmental impact, a range of complex criteria must be considered:

- Patient and Clinician Safety
- Regulatory Standards from OSHA, EPA and DOT
- Infection Control Standards

As a leading manufacturer of sharps and pharmaceutical waste management products, Covidien can provide environmentally sustainable options for waste management without neglecting issues like safety, infection control and regulatory oversight. Covidien is committed to delivering safe and responsible waste management for your facility through the Renewable sharps disposal products and the RCRA and PharmaSafety pharmaceutical waste products.

### Renewables™ Containers for Sharps Disposal

The Renewables line of sharps disposal products provides your facility with a safe and sustainable method of sharps management. The Renewables containers are manufactured using recycled plastics. Nearly 2,000,000 pounds of recycled plastic are reclaimed each year through Covidien's recycling program.

The Renewables in-room products feature an automatic shutoff design that helps to prevent overfilling. They also feature a built-in safety mechanism that makes them tamper-resistant, reducing accidental or intentional exposure to contents. The Renewables line of products includes a wide range of options to meet the site specific needs of your facility.

### RCRA and PharmaSafety™ Containers for Pharmaceutical Waste Management

Covidien has a full line of RCRA and PharmaSafety products for the management of your pharmaceutical waste stream. The proper disposal of hazardous and non-hazardous pharmaceutical waste is rapidly becoming a high profile issue for the healthcare industry. Recent escalation of EPA, and other regulatory pressure, expanding Joint Commission attention to the matter, and recent data demonstrating high levels of pharmaceutical contamination of surface and drinking water across the United States have placed a spotlight on the management of pharmaceutical waste.
