

Soft Products

Active Ice® soft products are designed to go directly from the freezer to their designated body part. By combining water with a non-toxic solution we provide a comfortable, long term cold therapy device that is malleable direct from the freezer. Latex-free elastic straps provide the soft compression most medical professionals prescribe post-operatively or post-injury. No matter where you're injured: knee, shoulder, wrist, elbow, back, foot or ankle we have the cost-effective cryotherapy modality for you.

Ice Products

Active Ice® ice products are composed of segmented water pillows, giving more coverage and longer duration of cold between insert rotations. They work well for both injuries and post-operative care. Our ice products deliver a safe, continuous cold compression therapy

Active Ice Accessories

Active Ice® universal wraps can be used on any small body area. Filled with either gel inserts or ice inserts, they provide soothing cold therapy and compression therapy all in one product.

Shower Shield®

This latex-free wound dressing/shower cover is the answer to the age-old question of how to keep water away from dressings. Shower Shield provides moisture-resistant coverage for your patients' wounds, dressings, central lines, stomas, shunts, catheters, colostomies and more.

Shower Shield is **safe**: It provides a barrier between wounds, dressings, shunts, stomas and other openings to the body to protect your patients from potentially dangerous moisture.

It **saves time**: Staffing time is reduced when prepping patients for showers.

It's **economical**: Compared to multiple dressing changes, Shower Shield saves both institutions and patients money.

And it's **versatile**: Available in three different sizes (7"x7", 9"x9" and 10"x12"), Shower Shield covers virtually any body site requiring protection from water in the hospital or at home.
